FOREWORD

Karrawarra is proud to stand at the forefront of composite genetics, focused on advancing productivity through increased kilograms per hectare and overall efficiency. This year, we are pleased to present an outstanding selection of rams, each reflecting the depth and consistency of our breeding program, underpinned by the dedication and expertise of the Karrawarra team.

Our mission remains clear: to deliver high-performing, commercially focused genetics that excel both in the paddock and on the plate. We are committed to supporting the long-term productivity, profitability, and genetic advancement of your flock.

Over the past year, lamb prices have reached record highs, driven by strong demand and a national flock at historically low numbers. With seasonal conditions improving, the market outlook remains positive.

Global demand for protein continues to grow, and incorporating Highlander and FocusPrime genetics into your operation ensures you are well positioned to capitalise on the opportunities ahead.

In response to ongoing interest and feedback, we have expanded our 2025 catalogue to include detailed sire information and an exclusive insight into Karrawarra's breeding objective—offering a clear view of the direction and focus of our Highlander program.

On behalf of Vanessa, Angus, Claire and myself, thank you for your ongoing trust and support of Karrawarra genetics. We look forward to welcoming you to our 2025 Spring Sale and partnering with you in achieving continued growth and success in the years ahead.

Best Wishes

This year's offering reflects our continued commitment to genetic excellence, with average index gains rising once again to an outstanding 5.45% for Highlanders and 6.58% for FocusPrime rams. These high-performing genetics are bred to deliver measurable results – both in the paddock and on the plate.

Karrawarra – Advancing Your Genetic Progress

SALE INFORMATION

Monday 29 Sept 2025

Inspections 9am
Sale 12pm (AEST)

On-property auction offering
Highlander & FocusPrime rams,
interfaced with AuctionsPlus

ON-PROPERTY AUCTION

Offering a quality selection
of Highlander and FocusPrime rams,
with live bidding interfaced via
AuctionsPlus.

- Pre-sale inspections will be held
on Monday, 29 September from
9:00am.
- Karrawarra's appointed selling
agents are Nutrien Livestock Wagga
Wagga.
- Outside agents must register new
buyers by 11:00am and be present at
Karrawarra on the day of the sale to
qualify for a 2% rebate.
- All Karrawarra rams are sold
exclusive of GST.

PRE-SALE SUPPORT & INFO

For assistance with understanding ASBVs,
managing your ram team data, or selecting
rams aligned with your breeding objectives,
please contact Leo on 0429 434 223.

Follow us on social media to view a selection
of paddock photos and videos in the lead-up
to the sale.

RAM VIDEOS

Short videos of each ram will be available
on AuctionsPlus. Links to these videos will be
shared via our website and social media
platforms.

If you are purchasing online and having
difficulty assessing a ram from his video,
please don't hesitate to contact us for further
information. Some rams simply aren't made
for the camera – but we're happy to assist
with additional details to support your
selection.

SALE DAY CATERING

Morning tea and lunch will be provided, with a
few refreshments following the auction.

LEO 0429 434 223

VANESSA 0427 434 227

OUR BREEDING OBJECTIVE

The Karrawarra Highlander Index is designed to deliver genetically balanced maternal composites, ideally suited to commercial prime lamb systems.

The index places the greatest emphasis on post-weaning weight (23%), followed by weaning rate (14%) and condition score (12%), breeding ewes that are fertile, resilient, and capable of rearing multiple lambs under commercial conditions.

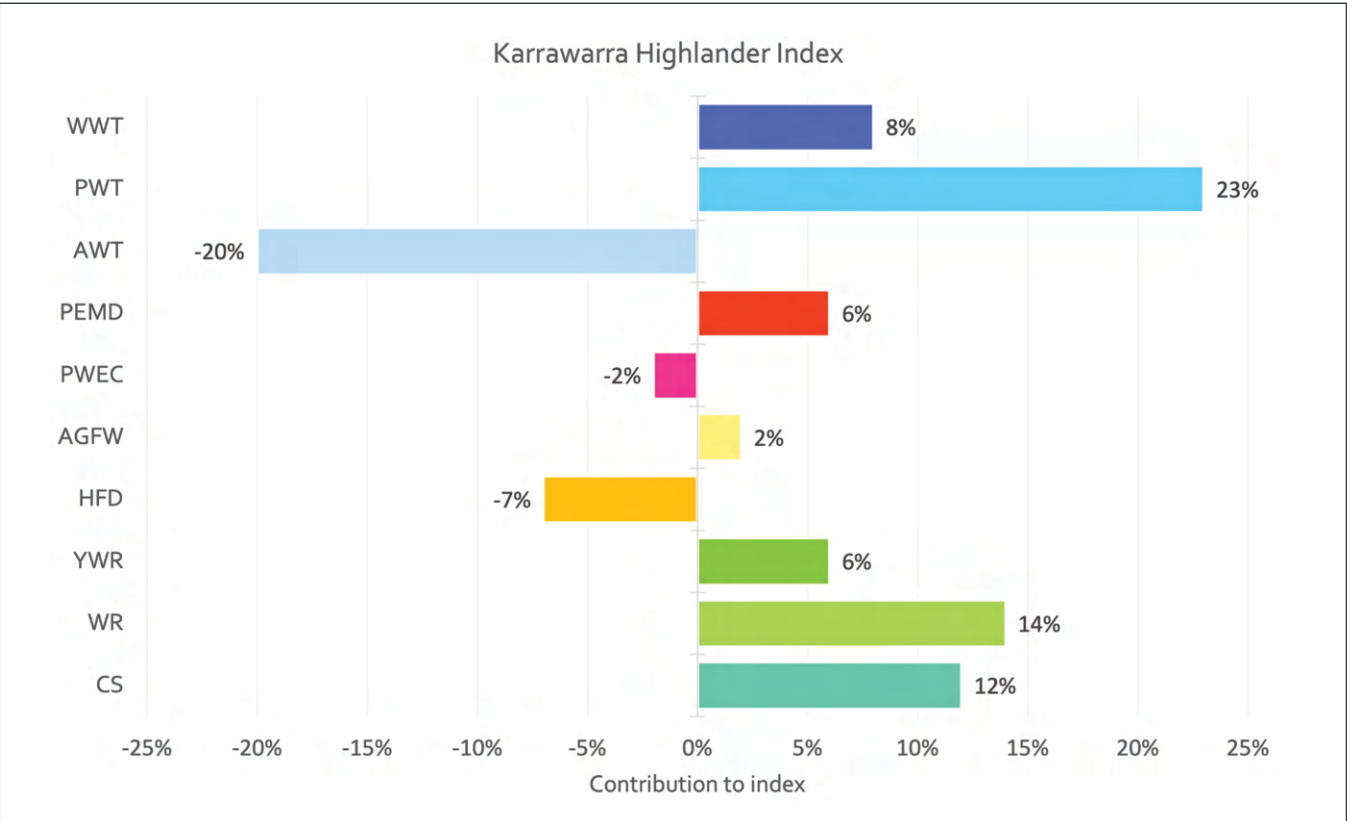

Moderate emphasis on weaning weight (8%) and eye muscle depth (6%) ensures lambs grow quickly and meet market specifications.

Yearling weaning rate (6%) is also included, recognising the contribution of ewe lambs in a productive maternal flock.

Negative weighting on adult weight (-20%) prevents excessive mature size and associated feed costs, while selection against worm egg count (-2%) improves parasite resistance and reduces drench reliance.

Smaller emphasis on hogget fleece diameter (-7%) and adult greasy fleece weight (2%) acknowledges their contribution without compromising maternal efficiency or carcase traits.

Overall, the breeding objective is to deliver moderate-framed, highly fertile ewes with strong maternal ability, efficient growth, and superior carcase quality – tailored for commercial prime lamb production in diverse environments.

KARRAWARRA QUALITY ASSURANCE

Our Highlander and FocusPrime rams are:

Ovine Brucellosis
Accredited – Annual
palpation and blood
tested by Coolac Vet
Services

Fully vaccinated for
clostridial diseases,
cheesy gland, scabby
mouth, and Ovine
Johnes Disease

Protected against
internal and external
parasites

Veterinary Health
Check – Conducted by
Coolac Vet Services
on 20 August 2025

Free from lice and
footrot

All rams were shorn
on 6 August 2025

A health statement is included in your post-sale package.

How to register as an AuctionsPlus User/Buyer

01.

✓ Create an account on AuctionsPlus

✓ Verify your email and phone number.

02.

✓ Enter your PIC number, ABN, and business details if applicable.

✓ Read and **accept the user rules** and responsibilities.

03.

✓ Finalise registration by completing the user quiz.

5-STAR DATA QUALITY SCORE

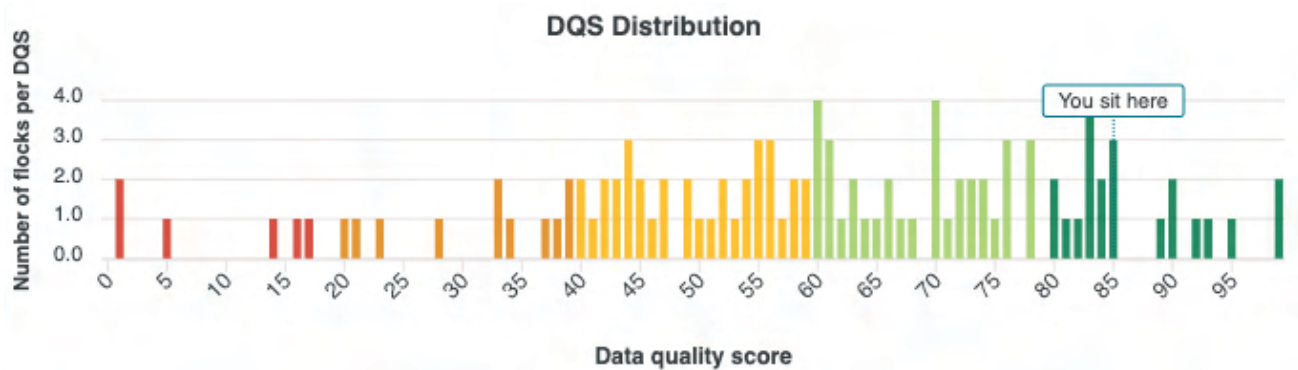

Karrawarra's 5-star Data Quality Score within Sheep Genetics continues to strengthen across both breeds, reflecting our commitment to industry-leading standards.

High-quality, accurate data underpins true genetic progress, giving buyers the confidence that our ASBVs are a reliable indicator of each sire's performance **in commercial conditions**.

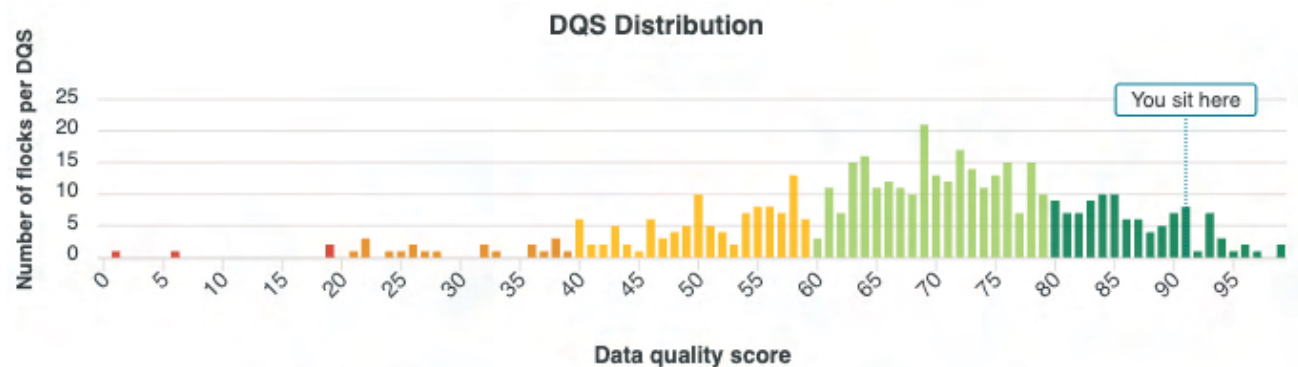

Maternal Sheep Genetics Analysis

Karrawarra Highlander – 84.8

Terminal Sheep Genetics Analysis

Karrawarra FocusPrime – 90.9

UNDERSTANDING ASBVs

An Australian Sheep Breeding Value (ASBV) is an estimate of the genetic potential a sheep will pass on to its progeny. Based on pedigree and performance information, they take the guesswork out of ram selection. To assist you with your ram selections, we have explained the Maternal and Terminal ASBVs in our ram catalogue against the Maternal and Terminal Breed Averages.

PWT POST WEANING WEIGHT

Weight at 200 days, this is an important ASBV for ewe lamb joining. Rams with a more positive PWT produce lambs that grow quicker and reach target weight in a shorter time.

YERA YEARLING EWE REARING ABILITY

How successfully did the ewe rear her litter? The ability of the ewe to rear the lambs she gives birth to, relative to other ewes with the same litter size. Sires with higher ERA will produce daughters which rear more of their litter.

MWWT MATERNAL WEANING WEIGHT

Rams with more positive MWWT produce daughters that will wean heavier lambs.

LS LITTER SIZE

How many lambs were born? Sires with higher LS will produce daughters that give birth to more lambs.

BWT BIRTH WEIGHT

Rams with more negative BWT produce lambs which are lighter at birth improving lambing ease.

Lot 5		240110		HIGHLANDER		Rear Type: 4				Born: 25/6/2024		
CH 190709		200494										
Sire: CH		Dam: 220267		Elite for growth and reproduction; the sale's top performer.								
CH 190491		183756										
LAMBPLAN MATERNAL ASBVS												
ASBV	Welfare		Growth		Reproduction					Wool	Index	
	BWT	PWEC	PWT	AWT	MWWT	YCON	YERA	LS	WR	YFD	MCP+	MWP+
	1.3	-47	17.7	15.8	0.3	0.36	0.07	0.37	0.33	-0.2	187	241
Breed average	0.4	-41	11.9	12.4	0.2	0.27	0.04	0.13	0.19	0.7	151	183
Comments:												

PWEC POSTWEANING WORM EGG COUNT

Rams with more negative WEC produce progeny who have a higher genetic potential to resist worm burdens

YCON YEARLING CONCEPTION

Did the ewe conceive? The ability of a ewe to get in lamb in comparison to all the ewes in the same joining event. Sires with higher YCON will produce daughters which have a higher conception rate when joined as ewe lambs.

YFD YEARLING FIBRE DIAMETER

A ram that has a YFD of -0.8 will produce progeny that are genetically 0.4 microns finer than a ram with a YFD of 0.

AWT ADULT WEIGHT

Weight as an adult, over two years of age. Rams with more positive AWT produce progeny that are heavier as an adult.

WR WEANING RATE

Weaning rate is the number of lambs weaned per ewe joined. A ram with a WR of 0.2 will have daughters who, on average, wean 0.1 more lambs per ewe joined, than daughters of a ram with a WR of 0.

Maternal Carcase Production + and Maternal Wool Production + INDEXES

These Indexes help you select for use within a breeding program when there are many traits of importance.

MCP+, MWP+ and LEQ Indexes

Indexes support you in selecting animals within your breeding program when considering many different traits of importance. Using an index when purchasing rams allows you to make genetic progress towards a more profitable sheep in your production system. Please take time to read up on what is included in the index you are using.

PWT POST WEANING WEIGHT

Weight at 200 days, this is an important ASBV for ewe lamb joining.

Rams with a more positive PWT produce lambs that grow quicker and reach target weight in a shorter time.

BWT BIRTH WEIGHT

Rams with more negative BWT produce lambs which are lighter at birth improving lambing ease.

PFAT POST WEANING FAT DEPTH

Rams with a more negative PFAT produce progeny that are leaner.

SHEAR5 SHEAR FORCE

Measure of the force required to cut through the loin muscle after 5 days of ageing. Rams with more negative SF5 produce lambs with more tender meat.

LE_DIR LAMBING EASE

Rams with a more positive LE_DIR will produce progeny that have lower incidence of lambing difficulties.

Lot 75		246073		FOCUSPRIME		Rear Type: 2		Born: 27/6/2024		
ASH 170011		FA190111		Highest LEQ indexed ram in the catalogue, high performer for marbling of the loin muscle (IMF), eye muscle depth, tenderness, & worm resistance.

Breed average	0.3	-25	15.2	2.2	-0.2	-0.37	1.8	2.4	0.6	139
Comments:										

PWEC POSTWEANING WORM EGG COUNT

Rams with more negative WEC produce progeny who have a higher genetic potential to resist worm burdens

PEMD POST WEANING EYE MUSCLE DEPTH

A ram with a more positive PEMD produce lambs that have more muscle and yield more lean meat.

IMF INTRAMUSCULAR FAT

Measure of the chemical fat percentage in the loin muscle. Rams with a more positive IMF will produce progeny with higher levels of marbling in the loin muscle.

DRESS

DRESS PERCENTAGE

Rams with a more positive DRESS produce lambs that have higher lean meat yield percentage at slaughter.

LEQ INDEX LAMB EATING QUALITY

The LEQ index balances large improvements in eating quality with modest increases in lean meat yield, and includes emphasis on worm egg count ASBVs.

YOUR KARRAWARRA RAM PURCHASE

Terms and Conditions of our Ram Warranty Policy are outlined in Karrawarra's Ram Buyers Guide which is included in your post-sale package. Please take the time to read this guide as it will help you maximise the potential of the genetics you have purchased on arrival to your property.

TRANSPORT

Vendors are welcome to transport their own rams at the conclusion of the sale. Could you please indicate your intentions with Vanessa or Leo prior to sale day.

Rams can be delivered by Karrawarra, Dick Smith Transport or Pages Transport into Tasmania. We will contact you following the sale to arrange delivery. The itinerary will be made in conjunction with other ram sales and might require you to supply additional transport from a central location to your property.

ON ARRIVAL TO YOUR PROPERTY

Whilst our rams are familiar with both people and husbandry practices, we encourage and urge all who interact with the rams to practice responsible livestock handling. When your rams arrive on your farm for the first time they may be stressed from travel and the change in environment. Please allow time for rams to acclimate.

INSURANCE

If you wish to insure your ram purchase please do so before leaving Karrawarra. Our ram insurance policy ceases as the rams leave Karrawarra.

TWO TOOTH RAM WARRANTY POLICY

- Guaranteed disease free, including Ovine Brucellosis on departure from Karrawarra
- Guaranteed through to conclusion of first joining
- Guaranteed for structural faults through to conclusion of first joining
- Guaranteed fertility, subject to veterinary examination, testing and conclusive report

SEMEN RETENTION RIGHTS

The following sets out the terms and conditions of sale by Karrawarra Pastoral Pty Ltd (Karrawarra Pastoral/Vendor) in addition to any terms in the AuctionsPlus User Agreement and Sale Terms.

The Purchaser acknowledges that Karrawarra Pastoral has invested significant time and expense in the development of its breeding and that it owns all intellectual property herein and retains the right to sell and use the semen from all rams sold on the following conditions:

1. Karrawarra Pastoral grants the Purchaser a licence to use the semen from the ram, naturally or by way of artificial insemination, on the Purchaser's own herd or flock. The Purchaser does not have any right to sell or otherwise commercially deal with the semen from or semen rights of the ram.

2. The names of all members of any syndicate, partnership or other joint arrangement of ownership of the animal by the Purchaser must be listed on the bidder card at registration prior to the sale. The purchaser warrants that it is not bidding or purchasing on behalf of another person who has not been disclosed to the vendor.

3. The vendor reserves the right to refuse a bid from a purchaser if it reasonably suspects that it may breach these terms and conditions.

4. If the Purchaser transfers the animal or an interest in the animal, whether by way of sale, gift or otherwise, then the transferee is bound by these rules and the Purchaser agrees to obtain the agreement of transferee to Karrawarra Pastoral terms and conditions.
